

August 14th, 2006

Located in Southern California, Universal Switching Corporation is proud to announce its relocation to its beautiful new facilities in Burbank CA. The company will be relocated and fully operational at the new facilities on August 14th, 2006.

In business for over fifteen years, the Company outgrew the two leased buildings it occupied in Van Nuys. The new Burbank location provides nearly three times the square footage the former Van Nuys facilities provided.

For additional client convenience, the new facility is virtually located at the popular Burbank (Bob Hope) Airport (BUR). See the map to the right. If you are planning to visit the facility after arriving at the airport, please call our sales department ahead of time so we can arrange to have you picked up. Driving directions are on our website.
